

Time to Heat up and Be Electrified! The New Eppendorf Eporator®

New! Eppendorf Eporator®

Your bacteria will love the way it makes their membranes feel! The Eppendorf Eporator is a great solution for efficiently transforming bacteria and yeast! Compared to chemical methods, electroporation yields much higher transformation efficiency. It also gives more reproducible results than other methods and is very simple to perform while saving you time!

Eporator

- Safe electronics and integrated electroporation chamber eliminates voltage leaks and misuse
- Compact space saving design for easy storage and transport
- Fast sample handling – just set the voltage or choose a present parameter and insert a cuvette

Limited Promotion

Purchase an Eppendorf Eporator and receive 10% off.
