

It's Hot and It's Cold!

Incubation at Its Best: ThermoStat plus™

ThermoStat plus™

Incubation is routinely used in labs. The ThermoStat plus offers a solution based on dry incubation to reduce the risk of contamination through water droplets. Exchangeable thermoblocks ensure effective heat transfer and flexibility to adapt to your particular application. The complete enclosure of the tubes enables optimal and fast temperature transfer – your sample is ideally incubated.

Ideal for:

- Transformation
- Enzyme reactions
- Cell lysis
- Ligation
- *In vitro* translation
- Plus much much more!

Limited Promotion

Offer 1: Get one of our ThermoStat plus Bundles which includes either a free 8 x 15 mL thermoblock or a free 4 x 50 mL thermoblock! A 23% savings!

Offer 2: Or purchase a ThermoStat plus Basic on its own and receive 15% off any block of your choice (for ordering information and prices, see page 4).
