Introduction
This course aims to train delegates in the principles and practices of undertaking Information Security Management System (ISMS) audits in line with the guidelines and requirements of the ISO/IEC 27001.

Who Should Attend
Designed for people who wish to conduct external audits on behalf of assessment bodies for ISO 27001 certification, but also suitable for those who need to conduct thorough internal audits on behalf of their own organisation or to be involved in ISMS management and consulting activities.

The training course has been designed, is delivered and approved to meet the requirements of IRCA/2016/07/1 Jan 07.

Learning Objectives
Participants will identify and learn the skills and techniques of auditing and to communicate the audit findings effectively to the organisation's management.

By the end of the course successful students will be able to explain
- the purpose of an ISMS and the processes involved in establishing, implementing, operating, monitoring, reviewing and improving an ISMS as defined in ISO 27001:2013, including the significance of these for ISMS auditors
- the role of an auditor to plan, conduct, and follow up an ISMS audit in accordance with ISO 19011 and the guidance criteria contained in ISO 27006:2007

and will have acquired the skills to
- interpret the requirements of ISO/IEC 27001 & ISO 27006:2007 in the context of ISMS audit
- undertake the role of an auditor to plan, conduct, report and follow up an ISMS audit in accordance with ISO 19011

Course Details
Role play and case studies simulate the real-world assessment and certification process.

The course runs for 5 days and is a mix of formal lectures and practical exercises, including evening work. It concludes with delegates taking an examination (IRCA paper).
