Cast Your Dreams

Cultured Marble materials are members of the flourishing family of Cast Polymer Products. Guided by industry quality control testing and standards since 1974, Cast Polymer is the product of choice for decorative and functional surfacing and sanitaryware such as countertops, bathtubs, tub walls, and more.

Through the process of "casting," or pouring chemically bonded mineral fillers into molds, manufacturers can create cast polymer products in custom shapes, designs, textures and colors. Finished products combine the beauty and functionality of natural stone with the ability to be shaped like wood. Cast Polymers allow homeowners and builders unlimited applications.

Why Cast Polymer?

Among the advantages of cast polymer:

- Molded to fit any shape or application;
- Unlimited colors;
- Stain, burn and scratch resistant;
- No seams or grout to collect germs or bacteria;
- Adds lasting value to your home; and
- Priced to fit your budget.

Make the comparison with:

- Seamed, easily scratched laminates;
- Tile that can chip and be difficult to clean;
- The hard, cold, brittle nature of costly stone; and
- Materials that limit your color and shape options.

Custom Designs for Every Project

Cultured Marble from International Marble Industries, Inc. lends itself to thousands of applications, including:

- Standard Vanity Tops
- Custom Vanity Tops
- Whirlpool Tubs
- Drop-In Tubs
- Standard Shower Bases
- Custom Shower Bases
- Soap & Shampoo Holders
- ADA Custom Shower Stoops
- Shower Seats
- Shower & Tub Surrounds

There is no better product for so many uses ... or with so many options.

Shape the Future

Whether you're in search of a standard vanity top or the complete line of International Marble Industries, Inc. products, our Cultured Marble and Cultured Granite products offer you the flexibility and the aesthetics you desire

So wake up and realize the unequalled benefits of cast polymer products in your home — products that last longer, look and feel better, and allow you freedom of choice, design and application.
