

RC-4 / RV-1

GEARBOX 18/6 REMOTE CONTROLS

RC-4 ROOM COMBINING CONTROLLER

- Provides a simple user interface for combining up to 4 divisible rooms in any possible configuration
- Multiple RC-4s may be used in a venue, and all will automatically synchronize with one another

BOTH CONTROLS

- Rear panel AtteroNet In and Out RJ-45 connections deliver both power and control data
- Remote units can be daisy-chained to one another for ease of installation
- All remotes are connected to the GearBox and to one another by standard CAT-5 cable
- Fits into a standard single gang wall box, and uses a Decora cover plate
- "Child-proof" mode available to discourage unauthorized changes

RV-1 REMOTE VOLUME CONTROL

- Allows user volume adjustment in 1dB steps, between 0dB and -26dB, plus Mute
- Multiple RV-1s may control volume in any venue, and will automatically synchronize with one another
- RV-1s automatically control the room (or rooms) in which they are located, automatically responding to changes in room configuration
