AmCham held its Annual General Assembly on April 25th, 2013 at the Royal Mansour le Meriden.

During the meeting, Walter Siouffi presented an overview of AmCham’s activities and its plans for 2013. The financial results and the audit report were then presented respectively by Yassine Bouajaja, Treasurer, and Abdellatif El Quortobi, Auditor. After a session of questions and answers, the Assembly approved the reports and elected a new Board which is composed as follow:

- **Walter Siouffi, President**
  Citibank, President Director General
- **Azzedine Kettani, Vice President**
  Kettani Law Firm, Attorney
- **Aziz Bidah, Vice President**
  PriceWaterhouse, Partner in Charge
- **Samir Benmakhlof, Secretary General**
  Microsoft Morocco, Director General
- **El Mostafa Obbade, Treasurer**
  Dell Morocco, Director General
- **Ahmed Hassan, Board Member**
  Colgate Palmolive, Director General
- **Ali Benkirane, Board Member**
  Groupe Benkirane, General Manager
- **Yassine Bouajaja, Board Member**
  Eli-Lilly, Director General
- **Danielle Tobias, Board Member**
  Laprophan, Export Manager
- **Harjeet Grewal, Board Member**
  Philip Morris Maroc, Director General
- **Sami Chabenne, Board Member**
  The Boston Consulting Group, Partner
On May 8th, 2013, DuPont and OCP announced the creation of a joint venture to provide consulting and training services to improve the safety, operational and environmental performance of companies in Morocco and other African countries. The joint venture will be named DuPont OCP Operations Consulting, and DuPont and OCP will each hold 50 percent of its share capital.

This joint venture will combine the internationally renowned expertise of DuPont Sustainable Solutions (DSS) and OCP’s world-class industrial experience and local market knowledge to provide consulting and training services in the areas of employee and contractor safety and training, process safety management, asset productivity, energy efficiency, integrated operations, sustainability strategy and environmental management.

DuPont OCP Operations Consulting will help OCP and industrial companies in Morocco and the region achieve world-class safety and sustainability performance.

“This new partnership underscores the importance of collaboration,” said James R. Weigand, president of DuPont Sustainable Solutions. “In line with our market-driven science strategy, this knowledge transfer will allow us to combine the strengths of two leading companies to expand the range of innovative safety, productivity and sustainability solutions available to the market. It will enable DSS to better meet local needs by providing world-class consulting and training services to industries in Morocco and key developing regional markets. OCP’s strong regional presence and long-term growth strategy makes them an ideal partner for us to achieve world-class safety performance and add value to the DuPont OCP Operations Consulting offerings.”

Amar Drissi, OCP’s executive vice president Operations said, “This joint venture will allow OCP to significantly enhance its safety and sustainability performance. Moreover, OCP’s ambition encompasses a broader aim to advance local industries and develop a more skilled workforce in Morocco. OCP has a strategic interest in ensuring that its industrial ecosystem in Morocco becomes safer, more environmentally sustainable and more productive which will improve the competitiveness of the country as a whole, allowing for more foreign investment and overall improve economic growth. OCP is committed to elevating safety standards in the region to world-class requirements. Our collaboration with DuPont is a great way to further support this strategic commitment and dramatically improve the performance of our operations and supply chain.”

More on DuPont and OCP at (www.dupont.com) - (www.ocpgroup.ma).
GREEN SAHARA FURNITURE DONATES A TABLE TO AMCHAM

David Bult, Founder and Owner of Green Sahara Furniture is an American artisan living and working in Morocco. His pieces are created with an eye to sustainability and a commitment to producing beautiful handmade work. He recently installed a magnificent handmade table at the American Chamber of Commerce’s office. The table (pictured left) is made of Moroccan walnut and argan as well as reclaimed wood. By incorporating reclaimed wood in his work Mr. Bult helps promote a positive environmental impact.

David Bult has been in the Greater Casablanca area for over five years now. Mr. Bult is keen to note the importance of Amcham Morocco in his success and stated that becoming a Member of Amcham was a great decision. He describes his experience starting his business in Morocco. He notes that there were some initial obstacles that were difficult to navigate during the first three months. The help from AmCham was invaluable and with the additional help of a Moroccan colleague, who also had experience working in the United States, he was able to get past these initial obstacles quickly and begin producing high quality artisan furniture and other goods such as jewelry and kitchenware in Morocco.

David’s workshop is located in an ideal location near the Morocco Mall. He observed an initial reluctance amongst the neighborhood’s residents who had some worries that a workshop would bring noise into the otherwise peaceful neighborhood. Over the years, David has shown himself to be a conscientious and considerate neighbor by minimizing noise and running the workshop during reasonable hours. The workshop has four local employees, an international intern, and David. This arrangement means that Green Sahara Furniture has contributed to local employment with fair wages, and provides an opportunity for international interns to see the beauty of Morocco and the possibility for international economic cooperation while working.

Not only does David help promote sustainability through using reclaimed wood, he also contributes a portion of his sales to the High Atlas Foundation, an organization that is committed to serving disadvantaged communities throughout rural Morocco. David shared a noteworthy story with AmCham Morocco concerning furniture that he created for the Kashbah Tamadot Hotel in Marrakech, which is owned by the lively entrepreneur and owner of Virgin, Sir Richard Branson. In order to obtain the wood needed for this project he worked with the High Atlas Foundation and their community contacts to earn the blessing of the village sheikh concerning the procurement of the wood. Once the project was concluded and his pieces had been sold to the hotel, David donated a portion of the earnings back to the High Atlas Foundation. Sir Richard Branson is not the only high profile client that Green Sahara has had the chance to work with. In fact, David has had the good fortune to produce furniture for members of the Royal family of Morocco. Furthermore, he has found his biggest market in selling to Moroccan Nationals, given an increased ability and desire of Moroccan consumers to own art. Nonetheless, international customers including Americans remain an important part of his clientele. To that end, greater expansion into the American market and ease of trade is important for Green Sahara. Trade is slowed by the costs for shipping large containers, though trade will definitely improve as costs come down.
On June 27th, 2013, Citibank Morocco celebrated a Global Community Day in Casablanca. Global Community Day is a once-a-year company-wide service day for tens of thousands of Citi employees all over the world uniting them into volunteering to help their communities.

This year, Citibank has chosen to visit l’Heure Joyeuse, a Moroccan NGO with the purpose of social and professional integration of hundreds of disadvantaged children in Morocco which has benefited from Citi Foundation grants. Citi was joined by other partners, including AmCham, Procter and Gamble, Colgate Palmolive and First Restaurant-McDonalds Morocco. Activities included various workshops benefiting the youngest such as making bead necklaces, painting murals, singing and dancing. Young adults had the opportunity to take part in “inspiration sessions” led by top executives of Citi including the CEO, Walter Siouffi, who shared his personal parcours and gave tips for success in professional life.

Every beneficiary of l’Heure Joyeuse was offered giveaways donated by Procter&Gamble, Colgate Palmolive and First Restaurant-McDonalds Morocco.

Citibank Global Community Day was an overall great success and ended with a huge cake offered by Citi putting smiles on every child’s face.
MICROSOFT CONFERENCE ON ERP AND CRM

On May 16, 2013, Microsoft Morocco held a conference in Casablanca concerning its Dynamics software applications and their relevance to small and medium sized businesses in Morocco. The discussion focused on Microsoft Dynamics’ central products; its ERP and its CRM solutions. ERP stands for enterprise resource planning while CRM stands for customer relationship management.

The logic of Microsoft Dynamics and the solutions that it is bringing to SMEs is based on the gains that can be made through services like cloud computing, whereby data is efficiently and remotely stored. The ability for these solutions to empower Moroccan SMEs is tremendous. Through a Cloud-based ERP solution business owners can track their inventory, financial data, and even have managerial feedback more easily and through a less cumbersome platform than before. This also makes sure that business owners can continue to access their data while one the move through the greater level of integration that the Cloud provides. This acknowledges the ever-increasing extent to which we hope to access larger and more complex levels of data from our mobile devices. Furthermore, the Cloud helps facilitate off-site solutions for businesses, which eliminates the need for on-site data backup capacity. This means that the price for these services is much more affordable and it is easier to create tailored, modular solutions for businesses. The good news that Microsoft was keen to underscore during the conference is that the Cloud is on its way to Morocco.

Microsoft is confident in Dynamics and believes that everyone will be using Microsoft Dynamics in 10 years. This corresponds with their forward looking belief that 80 percent of us will be using Cloud computing solutions in some shape or form by 2015. Consequently, the question that businesses frequently ask themselves is when and how to make the switch, as well as how to ensure the security of their data. The dizzying momentum of Cloud-based solutions as a general trend has implications for the implementation timeframe and security. This momentum means that widespread adoption is imminent as a matter of fact; chances are you are already using a programs and applications that are benefitting from the Cloud. Additionally, this speed of advancement in the Cloud computing realm means that encryption services and other security elements are quickly advancing as well.

The abovementioned potential modularity of the Dynamics solutions already means that businesses can find highly integrated solutions that perfectly address the nature and size of their business. Services like Microsoft Dynamics AX also allow users to modify programs themselves. This attention to the user is also evidenced in the Microsoft Dynamics CRM Dashboard (see image at left), which helps users follow multiple tasks, interpret data, and even have a view of the company’s relations on social networks.

An important possibility for Moroccan businesses is the eventual use of Microsoft Dynamics solutions to provide payroll services. In order for this dream to become a reality it is necessary to push for greater investment.

Additionally, Microsoft has put a lot of effort into making some really neat videos that can help explain some the ways that these software solutions can help companies. Here is a great intro to Microsoft Dynamics. Find out if it is time to switch to Microsoft Dynamics ERP by clicking here. Here is an in-depth look at how CRM works, and click here to find out more about how Microsoft Dynamics CRM can help with data integrity. Finally, if you want a good laugh while learning about the Microsoft Dynamics videos, click here.
AMCHAM-GWA SOCCER FRIENDLY MATCH

Saturday, June 1st presented itself as the perfect day to get out on the pitch. George Washington Academy graciously offered its beautiful facilities to host a friendly soccer match for AmCham members and GWA staff. The premises of the George Washington Academy were perfect for the event; there were two perfect football pitches as well as playgrounds, basketball courts, and more for family and friends to enjoy during the matches. Thanks to the combined effort of AmCham and the George Washington Academy attendance for the event was excellent. Friends and members of AmCham including, DHL, Microsoft, Cisco Systems, STG, Green Sahara Furniture, Oulamine, Emporium Investment all got out on the pitch. In addition, the event was a family oriented event so there were many children enjoying themselves as well as other family members and friends. After the impressive performances on the pitch, there was a potluck style BBQ. The potluck was a huge success and everyone was able to enjoy burgers, snacks, and refreshments.

We look forward to making the AmCham-GWA soccer an annual tradition for our members, their staff and their families.
The 17th edition of the AmCham Golf Challenge, which was held on June 8th, 2013 at the Royal Golf Course of Mohammedia, attracted 14 corporate teams and individual players from a wide range of AmCham member companies and diplomats in a delightful natural setting.

Players ranging from experienced golfers to relative novices took part in this good-natured contest that has become an annual tradition, and the long hours on the green were followed by a buffet cocktail, trophies presentation, tombola and networking.

Cristal trophies sponsored by Voltolina Cristal Strass were presented to the winning teams who were as follow:

**US Embassy team** in first place with 57 in net scores followed by **Ismawood** in second place with 52 in net scores, and **Ait Manna team** in third place with 52 in net scores but every participant came out a winner on this friendly and relaxed occasion.

AmCham would like to thank the Royal Golf of Mohammedia and its executive committee for offering this superb facility, and all of the numerous sponsors including Voltolina Cristal Strass, Kenzi Tower Hotel, Chi Nail Bar & Organic SPA, Agadir Beach Club, Brasseries du Maroc and les Eaux Minérales d’Oulmes.

Looking forward to 2014 challenge!
MIDDLE EAST AND NORTH AFRICA CONFERENCE ON STANDARDS DEVELOPMENT AND GOOD PRACTICES

On May 20-21, 2013, the Commercial Law Development Program of the United States Department held a conference in Casablanca on Standards Development and Good Practices that brought together actors from the United States and the MENA region. In attendance was the Moroccan Institute of Standardization, the Jordanian Standards and Metrology Board, the Tunisian Standards Organization, Saudi Arabian Standards Organization, AHRI, ASTM International, Caterpillar Inc., Underwriter Laboratories, and others.

A conference on standards, certification, and accreditation may be daunting for those who do not work in this domain. Reading “ISO 50001” (the ISO Standard for Energy Management) may be like reading a foreign language for many people. However, the world of standards is more interesting than a narrow lexicon only understood by standards experts. In fact, the world of standards has direct implications on our daily lives; standards oversight and cooperation helps ensure the compatibility and safety of objects and can even help gains promote gains in energy efficiency. Furthermore, a better global understanding of standards is an important part of promoting trade. Addressing weaknesses in the standards environment of a country or a market is an expedient means to tackling non-tariff trade barriers. In the same vein, the result of poor adhesion to standards and technical regulations is a non-tariff trade barrier; a product that does not conform to a standard cannot be exported more widely, whereas if the product(s) conformed and could be exported there could be important benefits in terms of revenue and employment generation.

Addressing this phenomenon was the objective of Standards Alliance program, which was being promoted at the event. The “Standards Alliance” is a program that was recently spearheaded by USAID within the framework of the WTO Agreement on Technical Barriers to Trade (TBT). The program provides technical and financial resources to developing countries in order to help businesses in these countries better conform to US standards. The result is mutually beneficial in that obstacles for exporters (for the US but also for the target developing countries) are decreased and developing countries can more easily ensure the quality and safety of their products.

More general themes included best practices for standards regulation and cooperation, and the role of standards in energy efficiency. The exchange on fostering cooperation was very productive given the fact that many US government officials were present as well as many standards experts and officials from the MENA region. Since this was the first conference of this type, it is difficult to say exactly what outcomes will be borne out of the discussion, but it is certain that the discussion will help in the creation of better standards conformity assessment as well as greater mutual-recognition of already established standards such as those in the Gulf States. Consumer appliances and electronics were at the heart of the energy efficiency conversation. For the sake of concision what is most important to note is that increased energy efficiency translates to a decreased burden on countries and their infrastructure, and it also empowers citizens to allocate their income to more productive endeavors than energy bills. Standards play an important role in this respect for everything from facilitating standardized testing to helping to standardize safe and effective refrigerants.
BIOTECHNOLOGY INDUSTRY ASSOCIATION VISITS AMCHAM

Lila Feisee, Vice President of International Affairs of the Biotechnology Industry Organization (BIO) recently visited Morocco and has met with AmCham on June 4th, 2013.

The purpose of this meeting was to present BIO and to discuss ways to boost Morocco’s role in the global biotechnology sector.

The Biotechnology Industry Organization (BIO) is a Washington DC based trade association that represents over 1100 companies, universities and research institutions working in the area of biotechnology. BIO members are involved in the research and development of innovative biotechnology products and technologies in the area of healthcare, agriculture and the environment. BIO’s members are interested in learning about the various opportunities for partnerships and collaborations throughout the world. For this reason, BIO helps them to facilitate these opportunities through international conventions and seminars.

This year’s convention BIO 2013 was held in Chicago, Illinois in April, and it attracted more than 13000 biotechnology professionals, academics and government organizations. Officials attended from 62 countries, including the USA, Thailand, China, India, Brazil, Russia, Turkey, Canada, several European countries, in addition to some Arab countries including Morocco and Saudi Arabia.

Biotechnology is new for several Arab countries that are fully aware of the benefits of biotechnology but need to formulate a strategy and a budget for this sector.

AmCham offered to work together with AMDI, MIS, AMIP and the Ministry of Health to lead a delegation to the next BIO International convention which will be held in San Diego, June 23-26, 2014.

BIO has also offered to help Morocco sets a roadmap for its engagement in the biotech sector and contribute to building up an innovative biomedical sector.

BIO has currently more than 400 biotechnology drugs in clinical trials targeting more than 200 diseases. In agriculture, there are more than 13.3 million farmers around the world using agricultural biotech processes and biotech crops are grown on more than 2.3 billion acres of farmland worldwide. Through industrial and environmental biotechnology, companies can now harness microorganisms in new and exciting ways to manufacture polymers, vitamins, enzymes, or transportation fuel, which will help shift societies from a petroleum-based economy to a "bio-based economy."

BIO members include small and medium sized entrepreneurs, Fortune 500 multinationals, research institutions and academic centers. BIO organizes seminars and International Conventions. The upcoming convention will take place on June 23-26, 2014 in San Diego. For details, please refer to their website: www.bio.org.
Endeavor Global, a U.S. based NGO, launched a new affiliate office in Morocco on May 31st, 2013. Both USAID and Citigroup Foundation have provided grants to support this launch in addition to support from other founding Board members which are Moulay Hafid Elalamy, President, SAHAM Group; Hicham Berrada, Co-President, Palmeraie Holding; Mohamed El Mandjra, Ex-CEO, Meditel, Said Ibrahim, CEO, Casablanca Finance City; Majid Iraqui, CEO, Jlec; Alami Lazraq, CEO, Alliances; Walter Siouffi, CEO, Citibank Maghreb and Mostafa Terrab, CEO, OCP Group.

Rabia El Alama met with the Managing Director, Amine Hazzaz, on June 13, 2013 and asked him the following questions:

Tell us more about Endeavor: Endeavor Global is an international organization leading the movement of High Impact Entrepreneurship around the world. It was founded in 1997 around the idea that emerging countries have entrepreneurs like Steve Jobs, Sir Charles Branson, and Oprah Winfrey, who do not reach their full potential because they are not in a favorable entrepreneurial ecosystem. Our organization’s goal is to catalyze High Impact Entrepreneurship, in order to transform the entrepreneurial ecosystem into a dynamic and empowering one, and finally stimulate long term economic growth.

What is the impact expected by Endeavor, by catalyzing these entrepreneurs? High Impact Entrepreneurs have a viral and systemic economic impact by generating wealth, and they also have a social impact by creating jobs. Since 1997, 801 Endeavor High Impact Entrepreneurs were selected, creating 200,000 jobs and generating annually over $6 billion in revenue. Our aim is to propel Moroccan High Impact Entrepreneurs from 5 or 150 million dhs to 500 million or 1 billion dhs and generate hundreds or thousands of jobs. But beyond Endeavor’s catalytic effect, the organization aims at multiplying the impact of these entrepreneurs to have a viral effect in the emergent countries’ economies. Endeavor’s ultimate goal is to establish these leaders as icons and role models, and most importantly inspire other entrepreneurs to take risks, innovate, and become High Impact Entrepreneurs.

How can an entrepreneur become an Endeavor Entrepreneur? Far from being a competition, the selection process is at each step an additional gain and enriching learning process for the entrepreneurs. First, the Endeavor team meets with the entrepreneurs to discuss their vision, strategy, and ambition. Second, the advisory Board, which is composed of experienced executives, engage on deep discussion with the entrepreneurs on vision, leadership, finance, and the difficulties encountered in expanding. Afterwards, those qualified meets the Board of Directors to discuss their higher purpose and ambitions. The Selection Panel, which is the last step of selection, involves being in contact with international business leaders such as Edgar Bronfman Jr., or Reid Hoffman, the founder of LinkedIn. In one day, the candidates benefit from the expertise of six eminencies that lead them to decisive aspects of their business. In terms of this exchange, the panelists choose entrepreneurs unanimously to become Endeavor entrepreneurs and give recommendations to others to rework on certain aspects of their businesses and come back.

What does Endeavor provide to catalyze its entrepreneurs once selected? Once selected, Endeavor entrepreneurs meet with an advisory Board composed of leaders and seasoned executives nationally and internationally, plus they have access to support in terms of sectorial expertise from partners such as Bain, Abraaj, Barclays, and other. In 2011-2012, Endeavor business leaders donated 45,580 hours of mentorship and over 20,000 hours of consulting pro-bono. Endeavor entrepreneurs also have access to Smart Capital throughout Endeavor’s partnership with Barclays allowing the most distinguished MBA students in the world, such as Harvard business School, MIT-Sloan, Kellogg, to spend up to 12 weeks with our entrepreneurs. See more on endeavor at http://www.endeavor.org/
As part of its commitment to supporting the basic principles of good corporate citizenship in Morocco, AmCham is re-launching the famous and prestigious AmCham Corporate Citizenship Award.

The intention of this award is to recognize small, medium and large companies for their appreciation of the values of good corporate citizenship, as well as to inspire all members to reach the level of excellence that we demand of ourselves as members of the AmCham. The winning company will be honored and promoted in various ways, most importantly through a company profile to be published in the AmCham newsletter and annual directory.

An independent panel of judges composed of prominent people such as the US Consul General, Afem President and AUI President will evaluate all candidates and select a winner. The winner of the award will be announced at the AmCham Gala Ball which will be held on December 7th, 2013, at the Sofitel Casablanca.

Candidates for the award should demonstrate the basic principles of good corporate citizenship with these primary characteristics:

- Maintaining a high level of transparency and corporate ethics
- Investing in the local community
- Valuing diversity in the workplace
- Respecting the ideas and opinions of others
- Appreciating the value of education as an engine for economic development
- Displaying a commitment to enhancing the business/investment climate in Morocco
- Enthusiasm for the processes of change and support for the Moroccan government's efforts

These basic principles can be measured according to a number of basic indicators, including but not limited to the following:

1. Active internship programs
2. Support for and participation with local schools and educational institutions
3. Health facilities and programs for workers
4. Codes of ethics and corporate conduct
5. Audited financial statements
6. Internal communications and transparency
7. Women in management
8. Gender balance in hiring and compensations
9. Bias-free hiring and minorities in the workplace
10. Support for local charitable organizations
11. Support and advocacy for health and safety standards, and enforcement
12. Support for local education, government, and health facilities
13. Promotion of good health practices (clean water, environmental sustainability)
14. Respect for intellectual property, copyright, trademarks, etc

Members are invited to participate to this innovative award and send their nominations no later than November 30th.

If you have any question about the award nomination or criteria, feel free to contact us by e-mail at: amcham@amcham-morocco.com

Dell receiving the 2012 AmCham CSR Award
APPLICATIONS FOR THE 2013 AMCHAM TRADE AND INVESTMENT AWARD ARE NOW OPEN

The American Chamber of Commerce in Morocco (AmCham) is delighted to announce the launch of the seventh edition of the AmCham-OCP Moroccan-American Trade and Investment Award.

This award recognizes American and Moroccan businesses – small, medium or large – that have succeeded in bilateral trade and/or investment through well-designed and innovative strategies while demonstrating good corporate citizenship.

The selection committee, composed of AmCham Board Members, will evaluate the applications based on quantitative and qualitative criteria and select the award winner(s).

The winning firms will be announced at the 2013 AmCham Annual Gala Ball, to be held on December 7th, 2013 at the Sofitel.

Interested companies in this award must submit their nomination form before November 30th, 2013.

We look forward to your participation in this Innovative Award.

*kraft Food receiving the 2012 Investment Award*
AD CORNER

The Executive Education Center of Al Akhawayn University

The Executive Education Center of Al Akhawayn University was created in 1998 at the initiative of the U.S. Government with an initial grant of US$ 3 million. The main goal of EEC is to contribute to higher education development as well as executive education in Morocco. Over the past 10 years, EEC developed successful programs including part time MBAs, Executive MBAs and soon two specialized masters. AmCham plays a key role in EEC by serving as equal partner to Al Akhawayn in the process of the development and the establishment of the center and exercising a joint control of the endowment fund.

EEC Degree Programs: Part Time MBA, Executive MBA, Masters: Masters of Sciences in Logistics and Supply Chain Management & Masters in International Trade.

EEC Continuing Education Program

EEC has developed customized trainings that respond to specific needs of continuing education in Public Management, Change Management, E-learning, Communication skills as well as computer science skills.

Information on Programs, contact Majdouline El Hassouni at 0522 503 664 or email: M.Elhassouni@aui.ma

AmCham CV Database

The AmCham CV database is a FREE service offered to AmCham members who are looking to recruit bilingual profiles.

How do I use the CV database?

2. A validation message will be received within the following hour to confirm your registration.
3. Use your log in and password to access the database.

What service is available under the CV database?

1. You can search for CVs by category such as: bachelor, masters or engineer.
2. You can post a job offer and receive CVs directly on your e-mail address.

Log in TODAY and let us know if you have any difficulty using this service.
