Can the pay gap between New Zealand and Australia really be closed?

An interactive presentation that explores the wage differential between New Zealand and Australia, whether the grass really is greener and what it would take to achieve alignment.

The 2025 Taskforce has set the ambitious goal of closing the income gap with Australia in the next 15 years. We weigh in to the debate with some fact-based observations founded on our extensive research in Australia, New Zealand and around the world. How big is the differential? How have other countries around the world 'closed the gap'? What drove it and what was the impact? What are the macroeconomic implications and how realistic is this goal? What does this mean for individual companies?

Program

8.15am-8.45am Registration & breakfast

8.45am-9.15am Presentation: Is the Grass Really Greener?

9.15am-9.30am Q&A
