

**Lauri Walker**  
**Program Manager, California Center for Sustainable Energy (CCSE)**

Lauri Walker is the program manager for the California Center for Sustainable Energy's (CCSE) special events including the annual Sustainable Energy Week (Family Energy Day, Conference, Commercial Tour) and Street Smart. She serves as the lead for Rebuild Central, a part of the Rebuild San Diego education and outreach effort which is a consortium of mission driven nonprofits that are committed to providing fire survivors with information on rebuilding with green, energy efficient, and sustainable products

Lauri has more than 18 years of experience in the area of energy efficiency. Prior to CCSE, she worked for the California state-wide marketing and outreach campaign, FLEX YOUR POWER, serving as one of the Southern California regional account manager. Lauri worked with the Residential New Construction Home Builders program promoting energy efficiency outreach to small businesses as well as regional and national retailers.

Lauri has also worked for the Federal ENERGY STAR® program and served as a liaison between Investor Owned Utilities (IOUs) and large municipalities in California and ENERGY STAR®. She has worked for San Diego Gas & Electric's residential energy efficiency group where she was responsible for the implementation and oversight of residential lighting, the Energy Information Center, and an online audit program.

Lauri also served as a member of the state-wide Lighting and Appliance committee that was tasked with selecting and overseeing a state-wide contractor responsible for operations and outreach for the California IOU Lighting and Appliance programs.
