Evaluation of Pediatric General Ward Rounds for Efficiency & Opportunities for Improvement

**Presenter:** Dr. Rey Wuerth PGY2

**Supervisor:** Dr. Moyez Ladhani

**Summary:** The inpatient pediatric medicine rounding process has been fraught with inefficiencies from both a patient care perspective and in terms of satisfaction from the perspective of multiple stakeholders (medical learner, staff, nursing and ancillary staff). In years prior a multi-disciplinary comprehensive review process took place; and subsequently a collaborative design of a new process to bridge these gaps. Now that this new process has been implemented, this meeting is to examine the evaluation process to objectively identify if 1) these gaps have been bridged? 2) to what extent? 3) how can the process further be optimized moving forward?

**Presentation Goals:**
- Review study design
- Seek feedback on the project and future directions

An immersive Indigenous health experience for pediatric trainees: A pilot study

**Presenter:** Dr. Lisa Brown PGY2

**Supervisors:** Dr. Stacey Marjerrison

**Summary:** The Royal College of Physicians and Surgeons has recently approved a recommendation from the Indigenous Health Advisory Committee to make Indigenous health education a mandatory part of postgraduate medical education. It is our goal to pilot and evaluate an immersive half day learning experience for pediatric residents in Indigenous health, in order to work towards improving care for our Indigenous patients.

**Presentation Goals:**
- Review study design
- Seek feedback on the study proposal and methodology

The Research Roundtable is a self-approved group learning activity (Section 1) as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada.
