Providing an opportunity for feedback and discussion on decision making as well as clinical pearls via text messaging for junior pediatric residents after covering hematology and oncology inpatients overnight

Presenter: Dr. Meredith Austin-Appleton, PGY2

Supervisor: Dr. Vicky Breakey

Summary: Plans to implement a text messaging based system that will allow junior pediatric residents the opportunity to ask questions following their night shift, and receive ‘clinical pearls’ before each night shift will be discussed.

Presentation Goals:
- Review implementation plan
- Obtain feedback on the study design

Engaging knowledge users: Usability testing of a Canadian Anaphylaxis Emergency Plan (AEP)

Presenter: Dr. Abeer Hegazi, PGY2

Supervisor: Dr. Susan Wasserman

Summary: Evidence suggests that the care of patients at risk for anaphylaxis is often inadequate. We plan to evaluate the usability of the Canadian Society of Allergy and Clinical Immunology (CSACI) AEP to determine whether it improves emergency response to a severe allergic reaction/anaphylaxis and to determine knowledge and barriers of using the AEP for self-management.

Presentation Goals:
- Review the current guidelines for Canadian Society of Allergy and Clinical Immunology AEP
- Obtain feedback on the study design

All faculty, research staff, allied health staff, and trainees are welcome to attend.
*These are interactive sessions - we want to hear your feedback, questions and great ideas!*
