Adolescent Vaccination Best Practices in Meningococcal B Disease Prevention

Thursday, January 18, 2018 | 12 – 1pm Central

Description
Meningococcal disease, specifically serotype B (MenB), is an ongoing problem in this country, particularly in light of recent university outbreaks. The disease can develop from initial symptoms to death within 24 hours, and as many as 20% of survivors have permanent sequelae. Notably, incidence rates are often a misconception due to under-detection and under-reporting. Given how disabling diseases can be that could have been prevented with vaccination, it is essential that healthcare workers delivering vaccinations enhance their standards of care in practice in order to deliver the highest rates of preventative care. The goal of the activity is to improve comprehension and initiate practice changes so as to improve immunization rates for all patients who are currently scheduled for the MenB vaccination.

Learning Objectives
At the conclusion of this activity, participants will be able to (or better able to):

• Discuss the current epidemiology of MenB in the United States and the profiles of patients at greatest risk for this vaccine-preventable disease.
• Describe recent MenB immunization recommendations made by the Advisory Committee on Immunization Practices (ACIP) and the rationale behind a category B classification.
• Examine the mechanism of action, contraindications, and adverse effect profiles of current MenB vaccines.
• Given a patient case, recognize best practices in counseling patients and their parents/caregivers on the importance of administering the MenB vaccine.
• Discuss practice considerations for administering the MenB vaccine such as documentation, billing, and screening for additional immunizations.

Target Audience
The target audience includes pediatricians and other clinicians who specialize in adolescent health, college health and immunization who care for patients who are scheduled to receive the Meningococcal B vaccine.

Speakers
Gary Marshall, MD
Professor of Pediatrics
Chief, Division of Pediatric Infectious Diseases
University of Louisville School of Medicine, Louisville, KY

Carole Moloney, RN, MSN, CPNP
Clinical Instructor of Pediatrics
Boston University School of Medicine
Pediatric Infectious Diseases - Boston Medical Center, Boston, MA

Planning:
Stephen I. Pelton, MD - Course Director
Professor of Pediatrics - Boston University School of Medicine
Professor of Epidemiology
Boston University School of Public Health
Director, Section of Pediatric Infectious Diseases
Boston Medical Center, Boston, MA

Hank Bernstein, DO - Course Co-Director
Professor of Pediatrics
Chief of Division of Pediatrics
North Shore University Hospital
Professor, Hofstra Northwell School of Medicine, New York, NY

Accreditation
Boston University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Boston University School of Medicine designates this live activity for a maximum of 1.00 AMA PRA Category 1 Credit™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

AAP Accreditation
This continuing medical education activity has been reviewed by the American Academy of Pediatrics and is acceptable for a maximum of 1.00 AAP credits. These credits can be applied toward the AAP CME/CPD Award available to Fellows and Candidate Members of the American Academy of Pediatrics

Commercial Support
This educational activity is supported by an educational grant from Pfizer.
