DESCRIPTION:
The State of New Hampshire, Public Utilities Commission, Electric Division has a full time vacancy for a Utility Analyst IV.

To perform senior level analyses and provide recommendations regarding energy efficiency and demand response, rate structures and policies concerning the regulation of public utilities.

RESPONSIBILITIES:
- Analyzes filings by the electric and natural gas utilities related to energy efficiency and demand response, rate structures and design for the purpose of determining appropriate energy efficiency and demand response programs, utility rates, rate structures and services.
- Leads staff facilitation and negotiation regarding utility energy efficiency filings.
- Appears as expert witness regarding energy efficiency and demand response filings.
- Analyzes proposed legislation and prepares Fiscal Impact Statements, especially as it relates to energy efficiency.
- Leads negotiations on substantive industry issues.
- Reviews recommendations and investigates utility policies; prepares reports as required by superiors.

MINIMUM QUALIFICATIONS:
Education: Master's degree from an accredited college or university with major study in the field of business, mathematics, finance, economics, or engineering. Each additional year of approved formal education may be substituted for one year of required work
experience.

Experience: Five years of experience in the analysis, regulation or management of public or private corporations or the operational phases of public utilities, two years of which shall have been dealing with rate analysis or one year of which shall have been at a public utilities regulatory commission. Each additional year of approved work experience may be substituted for one year of required formal education at the graduate level only. Possession of a professional designation such as CPA or P.E. or equivalent designation may be substituted for two years of work experience.

LICENSE/CERTIFICATION: None required.

RECOMMENDED WORK TRAITS: Extensive knowledge of the regulated industry and applicable laws, rules and regulations. Extensive knowledge of engineering, economics and financial principles and practices in the field of public utilities. Knowledge of the accounting and engineering factors involved in rate structure determination. Ability to prepare reports and/or exhibits in the development of investigations and analyses. Ability to establish and maintain effective working relationships with state and local officials, utility representatives and the public. Must be willing to maintain appearance appropriate to assigned duties and responsibilities as determined by the agency appointing authority.

DISCLAIMER STATEMENT: This job description is descriptive of general duties and is not intended to list every specific function of this class title.
