PCC Construction Components Promotes Victor Villavicencio To Workforce Development Manager

March, 2018. Gaithersburg, MD. PCC Construction Components, Inc., recently announced the promotion of Victor Villavicencio to Workforce Development Manager. Victor has worked 10 years in the construction industry as both General Contractor with the Donohoe Construction Company and a total of 7 years as Subcontractor with PCC Construction Components. At PCC, he started out as an Intern, continued his career growth as an Assistant Project Manager, Project Manager, and now begins his new role as Workforce Development Manager.

Victor’s new role in Workforce Development is very exciting. This expanded role will not only focus on internal training and personnel development, but he will also work with peer leaders in promoting our industry to the next generation of skilled craftsman. Victor’s engagement with the ABC community and his dedication to PCC and our industry has culminated in this important appointment. As Workforce Development Manager, he will be an enthusiastic sponsor, leader, and educator for the construction industry.

Mr. Villavicencio joined the Maryland Army National Guard as an Infantryman upon graduation from high school. He served in the military for 9 years, including three overseas deployments, two of which were in Iraq. In 2010 he was honorably discharged for the service.

Victor attended Montgomery College, exploring his passion and reinforcing his knowledge of the construction industry. He was heavily involved with the Student Construction Association (SCA) – a student chapter of the Associated Builder and Contractors, Inc. (ABC). He served as both Treasurer and President of the chapter during this time and graduated with an AAS Degree in Construction Management in 2010.
Over the years, Victor has been fully engaged in ABC participating in many committees both as chair and active member. He attends the annual retreats, conventions, and recently completed the LDP program and a recipient of the Rising Star of the year award in 2014.

PCC CONSTRUCTION COMPONENTS, INC. (www.teampcc.com) has grown into one of the Washington D.C. area’s most highly visible subcontractors. The organization has gained industry recognition for its Design Assist capabilities and the determination to finish. Its expertise includes time efficient, cost effective solutions for the custom architectural curtainwall and customized rainscreen applications for a variety of projects. Project composition includes Museums, Courthouses, Laboratories, Commercial Office Buildings, Airports, Sports Arenas, Federal, State and Local Municipal Buildings, Universities, Manufacturing Facilities and Technical Centers.

Please congratulate Victor next time you see him.
