

FUTURE STATE DMA ORGANIZATION

The organizational realignment will increase the number of senior leaders with key domain knowledge in their specific areas, and group them by functional area

Key Realignment Highlights:

- **Finance** – The Budget Management unit will be split into three separate units: Budget, Forecast, Planning and Analysis, and Finance and Accounting each servicing targeted program areas.
- **Operations** and **Clinical** – Will be redistributed into two future state sections: 1) Clinical; and 2) Operations to better align those units for programmatic delivery and management.
- **Compliance & Oversight** – Program Integrity, Contracts and the HIPAA sub unit will move out of Finance.
- **Business Information** – The newly formed section contains three units (previously Analytics, MMIS Support and other projects) that will focus on providing support across the agency with dedicated staff for each core section of DMA.
- **Office of the Director** – A new section will be created for strategic planning and improvements across DMA to provide long term planning and policy analysis.
- **External Transitions** – Two IT/HIPAA units, Applications and Operations will both move out of DMA and will align with the DHHS CIO.
