THE PEOPLE’S AGENDA FOR ARIZONA:
PRIORITIES AND POLICIES

The people of Arizona deserve a state government that listens to and respects their needs. The people of Arizona want to trust their elected officials but are uninspired by politicians beholden to contributors not constituents. The people of Arizona want a state that is accountable to its citizens.

Arizonans are calling for a new agenda for the state’s future: The People’s Agenda for Arizona. The People’s Agenda for Arizona is the foundation of a movement to:

Improve, protect, and support public schools:
- Full and equitable funding for public schools
- Regular or periodic evaluations of all tax subsidies
- No public school funds for private schools

Ensure access to basic healthcare:
- Affordable and accessible comprehensive mental and physical healthcare for all
- Statewide policy addressing and expanding healthcare access in underserved areas of Arizona
- Increased access to and accountability around mental healthcare services

Protect Arizona from divisive immigration policies:
- State policies that recognize constitutional rights of all residents regardless of status
- Policies that support a legal path to citizenship, keep families together and protect the rights of all workers
- Policies that prevent the state and local law enforcement from taking funds and participating further in the militarization of our border

The time is now. The moment has arrived.
