Many physicians interested in research will go on to become authors, peer reviewers, and scientific editors of research journals. However, the literature indicates that they are likely to be unprepared for any of these roles.

The Introduction to Publication Science course adopts a comprehensive, evidence-based approach to the publication process by introducing participants to the principles of publication science (i.e., Journalology). A course in Journalology exposes participants to the wide range of topics, practices, and products that are a part of the publication process, including learning about:

- How biomedical journals operate
- Reporting guidelines
- Manuscript writing
- Getting published
- Manuscript peer review
- Publication models
- Publication metrics
- Science in the media
- Increasing the value of biomedical research
- Publication ethics and research integrity
- Publication bias and consequences

Participants will gain an understanding of the myriad factors that can influence and impact the integrity of the scientific record and access strategies and resources to deal with them.
Overall Learning Objectives

- Describe and implement the Journalology process from manuscript submission to publication
- Select appropriate tools, strategies and publication models for participants’ own manuscripts
- Implement strategies to improve the chances of getting a manuscript accepted for publication
- Identify and describe a wide range of issues related to publication ethics, integrity and bias

Guest speakers include:
- Dr. David Moher, Director, OHRI Centre for Journalology; Editor-in-Chief, Systematic Reviews
- Dr. Greg Bryson, Deputy Editor-in-Chief, Canadian Journal of Anesthesia
- Dr. Diane Kelsall, Editor in Chief, CMAJ
- Dr. Jason Roberts, Senior Partner, Origin Editorial
- Ms. Jenn Ganton - Director of Communications and Public Relations, OHRI

This event is an Accredited Group Learning Activity (Section 1) as defined by the Maintenance of Certification program of the Royal College of Physicians and Surgeons of Canada for 13.0 hours. This program has been reviewed and approved by the University of Ottawa, Office of Continuing Professional Development.

This Group Learning program meets the certification criteria of the College of Family Physicians of Canada and has been certified by the University of Ottawa’s Office of Continuing Professional Development for up to 13.0 Mainpro+ credits.

Please make sure to bring your electronic devices to the workshop.

Registration Information

- Register online at: https://eventscpdc.med.uottawa.ca or by fax or mail.
- No registration form will be processed without the full registration fee included.
- Refunds less $75 administrative charge will be issued for cancellations received in writing by March 24, 2017. No refunds will be issued for cancellations received after that date. Refund cheques will be sent after the event.
