Title:
Engaging frail and seriously ill patients in research

Learning objectives:
1. Understand the importance of engaging frail and/or seriously ill patients in research
2. Describe the practical and ethical considerations of engaging frail and/or seriously ill patients in research
3. Appreciate the significance of patient engagement in research from a patient's perspective

Claire Ludwig, RN PhD(c) is a PhD candidate at the School of Nursing, University of Ottawa. Her doctoral work is focused on patient engagement in research, specifically engaging frail and/or seriously ill patients as knowledge users. Her other research interests examine how patients and nurses negotiate the process of triage and self-management in cancer symptom management. Claire is a senior health care leader involved in the development, implementation and evaluation of large-scale programs aimed at improving patient and caregiver outcomes. Claire is also a patient with cancer currently receiving immunotherapy treatment. She has served as a knowledge user on research projects as a health care administrator and as a patient advisor in the acute treatment phase of her illness.

TO REGISTER:
This session is offered by WEBEX from St. Michael's Hospital in Toronto. All registration requests must be sent to Meghan Storey: StoreyM@smh.ca by Wednesday, March 13, 2019 at 12:00 PM ET.
