VISION & MISSION

Vision
Our vision is that of a world in which every child, adolescent and adult with an inborn error of the immune system benefits from both clinical and scientific knowledge allowing them to live their lives to their full potential.

Mission
Our mission is to improve awareness, diagnosis, treatment and understanding of primary immunodeficiency diseases through education, documentation, promotion of best practice guidelines, research and evaluation of patient outcomes.

As the leading society in the field, ESID is committed to collaborate with healthcare professionals, patient organisations, industry and governmental bodies.

To achieve the mission, five strategic priorities have been identified:

- Strengthen Registry
- Enhance Education
- Strengthen Membership
- Develop Meetings
- Extend Collaboration

These priorities are underpinned by sustainable finances, effective governance and solid marketing and communications support.

<tr>
<td>Ensure that the ESID registry is the data repository for Primary Immunodeficiencies in Europe by professionalising the structure and processes and expanding reach. The registry should be the fundamental tool used by all WPs to perform studies, assess epidemiological trends, and ultimately improve patients’ lives.</td>
<td>Sustain and increase the quality of ESID educational activities through encompassing all activities under the umbrella of ESID Education, developing new impactful, needs-driven activities and expanding the reach of ESID Education.</td>
<td>Sustain and increase active membership to grow the ESID community and ensure a vibrant and engaged network.</td>
<td>Sustain excellence of the ESID biennial meeting and develop other formats to address the needs of the ESID network to advance knowledge sharing, research and clinical practice in immunodeficiencies.</td>
<td>Develop strong and sustainable partnerships with other organisations involved in PID and wider stakeholders to achieve common goals related to the field.</td>
</tr>
