International Opportunities for Clinicians

We are looking for obstetricians, paediatric/neonatal doctors, midwives and nurses to work in our projects in Rwanda, Myanmar and Sierra Leone.

All flights, preparation costs and accommodation are covered by the project. Clinicians will also receive a stipend of per month, plus in-country travel costs.

Comprehensive support will be provided by in-country programme managers and a dedicated RCPCH team in London.

Interviews for these roles will take place at candidates’ earliest availability.

There is no closing date for these positions,

What we are looking for:

**Paediatrician/Neonatologist**

**Essential Criteria**
- Full membership of relevant professional body
- Evidence of interest and involvement in teaching.
- Understanding of research methods, and monitoring and evaluation.
- Willingness and ability to collect data in relation to the programme quality improvement outcomes

**Desired criteria**
- Experience working in a resource poor setting
- NLS / EPLS / APLS provider
- Demonstrable management experience preferred (eg quality improvement experience within NHS; completed audit cycle; guideline writing etc)

**Paediatric/Neonatal nurse**

**Essential Criteria**
- Active registration with relevant regulatory body (NMC etc).
- At least four years post-graduation experience, with significant experience of looking after sick and new-born babies and children in an acute setting.
- Evidence of interest and involvement in teaching, preferably specific experience of this within paediatrics/neonates
• Willingness and ability to collect data in relation to the programme quality improvement outcomes
• Tropical Nursing qualification or equivalent

Desired criteria
• Experience working in a resource poor setting
• NLS / EPLS / APLS provider
• Demonstrable management experience preferred (eg quality improvement experience within NHS; completed audit cycle; guideline writing etc)

Obstetricians

Essential Criteria
• Full membership of relevant professional body, Royal College of Obstetricians and Gynaecologists (RCOG)
• Evidence of interest and involvement in teaching, and experience or evidence of interest in global health working
• Understanding of research methods, and monitoring and evaluation
• Willingness and ability to collect data in relation to the programme quality improvement outcomes

Desired criteria
• Completion of an Emergency Obstetric Course such as Management of Obstetric Emergencies and Trauma (MOET) training course, LSTM’s ‘Making it happen’ EmoC course or RCOG Essential Obstetrics skills course.
• Experience working in a resource-poor setting
• Demonstrable management experience preferred (eg quality improvement experience within NHS; completed audit cycle; guideline writing etc)

Midwives

Essential Criteria
• Active registration with relevant regulatory body (NMC or equivalent).
• At least four years post-graduation experience, with significant experience of midwifery practice in an acute setting.
• Evidence of interest and involvement in teaching, preferably specific experience in emergency midwifery
• Willingness and ability to collect data in relation to the programme quality improvement outcomes

Desired criteria
• Experience working in a resource-poor setting
• Tropical health qualification or equivalent
• Experience delivering training/mentoring based on EmONC, Helping Babies Breathe and/or Helping Mothers Survive
• Demonstrable management experience (eg quality improvement experience within NHS; completed audit cycle; guideline writing etc)
