Title: Formula Kite Class Rules
Subtitle: Position of Registered Series Production Marks

A submission from: The IKA Executive Committee

Purpose or Objective
To change the position of the registered series production mark on the hydrofoil mast.

Proposal
Amend Class Rule B.4.1 as follows:

B.4.1 Registered Series Production foil systems registered after December 31st 2017 \textbf{2019} shall display the official IKA Registered Production Equipment Plaque on the \textit{port} \textbf{starboard} side of the mast, and a unique manufacturers serial number on mast, fuselage, front wing and stabilizer (rear wing). The \textbf{manufacturers} serial number shall be in a place visible without dismantling the foil system. Brand and Model/Size shall be coded into the \textbf{manufacturers} serial number. The \textbf{manufacturers} serial number may be covered by clear coating applied by the manufacturer.

Current Position
As above.

Reason
1. The position on the \textit{starboard} side is more practical for equipment inspection during racing.
