WE WANT TO KEEP YOU INFORMED!

- Sign up to receive project updates at seattlestreetcar.org/centercity
- Contact the project team at centercitystreetcar@seattle.gov or (206) 400-7578

WHAT ARE THE BENEFITS?

- The new streetcar will run every 5 minutes at peak times and will connect more people to 1st Ave to live, work, shop, and play

HOW WILL BUSINESSES BE SUPPORTED DURING THIS WORK?

- Crews will maintain access to businesses throughout construction, and creative signage will help direct people walking. Sidewalks will remain open except in small sections on a temporary basis.
- The Small Business Development team at the Office of Economic Development has business consulting services available to support small businesses along the route. Contact us for more info.

CONSTRUCTION SCHEDULE

Note: We’ll have more to share about what to expect during the north phase of utility relocations and streetcar construction as that work gets closer.

NORTH – Streetcar track construction (SDOT) – 1st/Seneca to 6th/Stewart

SOUTH – Streetcar track construction (SDOT) – 1st/Jackson to 1st/Seneca

Improvements at all intersections and corners will enhance the pedestrian experience and ADA access

Improvements to all-way scramble intersections at Pike, University, and Cherry streets will designate pedestrian crossings more clearly

Before the Center City Connector Streetcar track construction can begin, water main, sewer, electrical, and natural gas utilities must be relocated and replaced along the future streetcar route. This work will provide more reliable and resilient utilities for customers and allow better access to those utilities after the new streetcar tracks are built. The first phase of utility work will start in October 2017 and will be focused in Pioneer Square.

Utilities Construction – South

Water, sewer, electrical, and private utility work – 1st/Jackson to 1st/Seneca

Utilities Construction – North

Water, sewer, electrical, and private utility work – 1st/Seneca to 6th/Stewart

Streetcar Construction

South – Streetcar track construction (SDOT) – 1st/Jackson to 1st/Seneca

North – Streetcar track construction (SDOT) – 1st/Seneca to 6th/Stewart

Streetcar stations and finishing touches – Whole alignment

Note: We’ll have more to share about what to expect during the north phase of utility relocations and streetcar construction as that work gets closer.

When is the natural gas utility work?
Puget Sound Energy (PSE) will continue gas relocation from mid-October through the end of December 2017.

What are the impacts, and how will they be minimized?
PSE will work to minimize impacts to neighbors, the environment, and traffic during construction. Businesses and residents can expect:

- Temporary traffic impacts, such as lane closures and limited access to on-street parking
  - Lane and parking restrictions will be limited to when crews are working
- Some work may require a temporary disruption in service to natural gas customers
  - If a natural gas outage is necessary, a PSE representative will coordinate directly with affected customers

*Work hours: Monday through Friday from 9 AM to 3 PM (days) and Monday through Thursday from 7 PM to 5 AM (nights)*

*Some additional weekend work during the day may be necessary. Surface cuts, excavation, and other typically noisy work will not occur between 10 PM and 5 AM

Contracting crews hired by the City will install a new water main, reline the existing sewer main, and make drainage improvements. We expect this work to occur from October 2017 to the end of 2018.

What are the impacts, and how will they be minimized?
After utility location work in October/November 2017, crews will begin relocating the water main in January 2018. Relocating water and sewer lines is a major undertaking. We’ll work to minimize impacts during construction. Businesses and residents can expect:

- Temporary water shutdowns
  - Seattle Public Utilities (SPU) will work with residential and business customers to determine the best times for water shutdowns
  - SPU will provide advance notification to customers

- Northbound lanes on 1st Ave will be closed to through traffic between S Jackson and Cherry streets in phases
  - This is to allow space to preserve the London Plane trees in the center median
  - We’ll work to keep a southbound lane open during the day with intermittent closures during nights and weekends

- Multiple intersection closures
  - Intersection closures will take place at night and on weekends

Most parking will be removed along 1st Ave, and load zones have been shifted to side streets
- We worked closely with businesses and residential buildings to replace load zones 1 for 1 within 1 block of the current location

We’re working with King County Metro to coordinate bus routes and detours during construction

Example of PSE natural gas relocation work
