This block can be created using the SVG templates found on my website [here](#) with your Cricut Maker. You can also piece this using traditional squares and rectangles! Refer to my video for a full walk through of piecing using the Cricut Maker!

### Pattern Note

Please read all instructions before starting your project. Seam allowance is 1/4 inch, unless stated otherwise.

Finished block size (including seam allowance) : 5” x 5”
BUILDING BLOCK USING CRICUT MAKER

Use your Cricut Maker to cut out the templates using the SVG file.

(You can also do this without the Cricut by cutting out the templates on page 6.)

Piece the template pieces together as show in Figure 2. Make sure to piece each row seperately.

Note: The rectangles on the third row should be longer than they are tall! Make sure you lay them out correctly.

Once each of your three rows are complete, sew the three rows together as shown in Figure 3.

For a full walk through cutting and piecing these blocks using the Cricut Maker Method, refer to my YouTube video.
BUILDING BLOCK USING TRADITIONAL PIECING

Right sides together, line up pieces A and F as shown in Figure 4. Sew along the diagonal, represented by the red dashed line. Trim the corner off, leaving a quarter inch seam allowance. Press the two pieces open.

Attach piece B the same way as piece A on the opposite side of piece F.

Right sides together, place C units on both ends of piece E. Mark diagonal lines as shown in Figure 6. Sew along these lines and trim off the excess corners, leaving a quarter inch seam allowance. Press both sides open.
Sew the three D units together as shown in Figure 7. Make sure the units are wider than they are tall when piecing together.

Sew all three rows together and press open.

Congratulations on making your tree coaster block!

I prefer to bind the coasters using a 2.25” wide binding. Check out this tutorial for steps on binding these smaller quilts.

Happy Sewing!
Make sure to use Adobe Acrobat Reader to print these template pieces at 100%. These are not meant to be used with the Cricut Maker, but they can be cut and used to cut the fabric in a similar way. Check out this video for tips on using these to create plastic templates.
