Position Announcement

The Department of Agricultural Education and Agricultural Sciences is pleased to announce multiple Masters and/or Ph.D. level assistantships for qualified graduate candidates who have an interest in teaching Agricultural Education, Agricultural Leadership, and Agricultural Sciences.

Qualified candidates will receive assistantship funding to teach graduate and undergraduate courses in Agricultural Education, Leadership, and Agricultural Sciences. Assistantships are 9-month, .49 FTE positions with the opportunity for summer teaching employment. Salary and benefits are competitive and funded assistantships include full tuition waivers.

If you have a passion for Agricultural Education, youth leadership development, community and civic leadership and engagement, STEM education, or career and technical education, this is a great opportunity for you. This position combines rigorous masters or doctoral education programs with instruction and advising duties. Successful candidates for funded assistantships must meet the admission requirements for admittance into the College of Education Agricultural Education option. In addition, candidates must be able to work independently and in teams, and be willing to collaborate in multi-disciplinary projects. Preferred applicants will have excellent teaching skills and outstanding verbal and written communication skills.

The Department of Agricultural Education and Agricultural Sciences is a team who prepares leaders, communicators, and educators to meet the demands of 21st century agriculture and those served by it.

Application Materials

To apply, please send a current resume, writing sample, unofficial transcript, contact information for three professional references, and a 2-page double-spaced personal statement describing your experience with teaching and desire to pursue a graduate degree.

For additional questions, or to submit application materials, feel free to connect with:

Becky Haddad

These positions are open until filled with preference given to applications received before December 14th.
About the University

Oregon State is a leading research university located in one of the safest, smartest, greenest small cities in the nation. Situated 90 miles south of Portland, and an hour from the Cascades or the Pacific Coast, Corvallis is the perfect home base for exploring Oregon’s natural wonders.

Oregon State University has always been a place with a purpose — making a positive difference in quality of life, natural resources and economic prosperity in Oregon and beyond. Through discovery, innovation and application, we are meeting challenges, solving problems and turning ideas into reality.

Founded in 1868, Oregon State is the state’s Land Grant University and is one of only two universities in the U.S. to have Sea Grant, Space Grant and Sun Grant designations. Oregon State is also the only university in Oregon to hold both the Carnegie Foundation's top designation for research institutions and its prestigious Community Engagement classification.

As Oregon’s leading public research university, with $308.9 million in external funding in the 2014 fiscal year, Oregon State’s impact reaches across the state and beyond. With 11 colleges, 15 Agricultural Experiment Stations, 35 county Extension offices, the Hatfield Marine Sciences Center in Newport and OSU-Cascades in Bend, Oregon State has a presence in every one of Oregon’s 36 counties, with a statewide economic footprint of $2.232 billion.

Oregon State welcomes a diverse student body of over 30,058 students from across Oregon, all 50 states and more than 100 countries. They can choose from more than 200 undergraduate and more than 80 graduate degree programs, including over 30 degrees online offered through Oregon State E-campus. Oregon State increasingly attracts high-achieving students, with nationally recognized programs in areas such as conservation biology, agricultural sciences, nuclear engineering, forestry, fisheries and wildlife management, community health, pharmacy and zoology.

Oregon State also ranks high in sustainability, fourth among universities nationwide for using renewable energy and first in the Pac-12 Conference. And our students literally help power the university: 22 exercise machines at Dixon Recreation Center are connected to the grid.

The 400-acre main campus in Corvallis includes a Historic District, making Oregon State one of only a handful of U.S. university campuses listed on the National Register of Historic Places. The district includes such icons as Weatherford Hall, the Memorial Union and Benton Hall, the oldest building on campus.

Oregon State is located in Corvallis, a vibrant college town of 55,000 in the heart of Western Oregon’s Willamette Valley. Corvallis consistently ranks among the best and safest cities to live in the U.S., as well as among the most environmentally responsible.

About the Department of Agricultural Education & Agricultural Sciences

The Department of Agricultural Education and Agricultural Sciences is one of twelve departments within the College of Agricultural Sciences (CAS). Programs within the department include an undergraduate degree in Agricultural Sciences, Master’s Degree in Agricultural Education, a Ph.D. option, and several minors. Minors include Comparative International Agriculture, Agricultural Sciences, and Leadership. In addition, the program houses the CAS Leadership Academy and is active in hosting CASE pre-service and in-service institutes, as well as a Summer Ag Institute for K-12 teachers. We are looking forward to sharing our growing department with you!
