Ph.D. Assistantship Available

The Department of Community Sustainability at Michigan State University is pleased to announce a Ph.D. assistantship in Agriculture, Food, and Natural Resources (AFNR) Education. We are seeking an individual eager to explore the role of AFNR Education in promoting the economic, environmental, and social sustainability of communities. Individuals interested in metacognition, self-regulated learning, systems thinking, socio-ecological problem solving, and/or resilience are encouraged to apply.

Required Qualifications
- Master’s degree in related discipline
- Strong written communication skills

Preferred Qualifications
- Successful grades 6-12 teaching experience

Position Description
- 0.50 FTE, 9-month appointment (with possible summer funding)

Submission Materials
- Cover Letter
- Résumé or Curriculum Vitae
- Priority given to applications submitted by 5:00 pm on January 3rd, 2020. Submit application materials to Buddy McKendree via email (rbm@msu.edu)

For further questions or discussion of this opportunity, please email rbm@msu.edu or call 517-355-0102.

Department
The Department of Community Sustainability is a community of scholars who engage with colleagues, students, stakeholders and communities to address social choices within specific environmental, economic and cultural contexts that advance or conflict with sustainability goals. More about our Department can be found at www.csus.msu.edu.

University
Michigan State University (www.msu.edu) is a pioneer Land Grant institution based in East Lansing, Michigan. The University provides regional, national, and international leadership in basic and applied research, excellence in teaching, an emphasis on international engagement, and a strong extension program that partners with diverse stakeholders to bring science-based responses to social and environmental challenges.
