

# ENGAGING GIRLS IN STEM: MAKING THE CONNECTION FOR ACTION

## ABOUT THE EVENT:

Science, Technology, Engineering and Mathematics (STEM) education must be a priority for schools to keep our country competitive in an increasingly technical and science focused global job market. The Riverside County Office of Education in collaboration with the California Department of Education and California Commission on the Status of Women and Girls are working together to promote statewide outreach and encouraging girls and young women to explore, enroll, and complete STEM courses as well as pursue postsecondary degrees in STEM majors.

**A Share-Fair of organizations highlighting their STEM initiatives around girls**

**Panel of experts and practitioners in the STEM field that will share research, and their experiences inspiring girls to pursue careers in the STEM fields**

**Network with other professionals**

## ARE YOU IN?

**Online Registration is available.**
