Participants needed for study on the perception of emotional stimuli!

Contribute to psych research and get $10!!

We are currently recruiting participants to complete a behavioral assessment where they will be asked to rate visual stimuli (faces), based on the stimuli’s perceived emotion and different physical attributes.

The study will take approximately 1 hour and will take place at the McGill Rabinovitch House (3640 Mountain Street, Montreal H3G 2A8).

The study will be conducted in English and participants will be compensated $10 for their time.
