Reports from Jaw prison confirms continued collective punishment of prisoners by forces and depriving them of their basic needs and rights.

The prisoners are deprived of visits, calls to their families, as well as medical treatment at the prison’s clinic. Also, security forces have been subjecting them to ongoing beating and abuse.

These punishments have been going on for a week with total disregard to the ill prisoners including some who suffer from chronic illnesses, in addition to injuries due to repeated abuse by security forces.

Prisoners’ families expressed their grave concern over the wellbeing of their sons. They held the prison’s administration responsible for the wellbeing of prisoners while they condemned the silence of foreign countries that continue to support the regime.

The prison administration claimed that prisoners of building 3 and 6 refused to attend visits which were denied by prisoners.
