Cyriax, Richard J. (1885-1967)

*Sir John Franklin’s Last Arctic Expedition: a Chapter in the History of the Royal Navy*

**Description**  

The first edition of one of the rarest works on the twentieth-century Franklin search. This important scholarly account of Franklin’s last voyage is based largely on the account of George McClintock.

Compiled from both published and non-published sources. Of importance is the account addressing the fortunes of the expedition’ the account of the search for the lost expedition with an outline of the principal events which, while not associated with the search itself, have occurred in connection with the ill-fated enterprise.

*Octavo (217 x 138mm). 22 pages. 4 maps, 3 of which are folding (upper edge of map strengthened). Publisher’s original blue cloth. Bindings tight and square. Text clean, light even toning. Moderate handling wear. Spine a bit darkened, and handling wear to cloth of rear board.*

REF: Arctic Bib. 21321.

$975
One of the important Franklin search expedition and dedicated to Lady Franklin.

Osborn, Sherard (1822-1875).

Stray Leaves from an Arctic Journal: Or, Eighteen Months in the Polar Regions, in Search of Sir John Franklin's Expedition, in the Years 1850-51

First Edition, First Printing. 12mo; 183 x 113mm, 7.5 inches tall. 320 pages.

Osborn was a commander on Horatio Austin’s Franklin Search Expedition in command of the Pioneer. He includes an account of the expedition and over-wintering at Lancaster Sound. The voyage was by way of Baffin Bay, Lancaster Sound, Barrow Strait, then the wintering at Griffith Island, and return.

The expedition proved that Franklin's ships had not been lost in Baffin's Bay. Includes informative notes on West Greenland Eskimos, negotiating the ice of northern Baffin Bay, ice conditions in the Canadian Arctic waters, hunting adventures, clothing, food and equipment, carrier pigeons, the sledge journeys, arctic nature and winter recreations.

As a surveying expedition, it was eminently successful. . . due to the steam- tenders, which, during the summers of 1850 and 1851, held out new prospects for arctic navigation. The way in which the Pioneer or Intrepid cut through rotten ice, or steamed through the loose pack in a calm, was an object-lesson to the whalers, and led directly to the employment of powerful screw-steamers in the whaling fleet [DNB].

Original plum cloth stamped in blind and gilt, all edges gilt. Rebacked with faded original spine laid down, New endpapers. Text block over-opened in two placed places. Small bookplate upper corner of front paste-down

An expedition to Siberia undertaken for the purpose of carrying out a series of zoological, geographic, ethnographic and magnetical observations. During the course of his journey Erman was able to confirm the existence of a Siberian magnetic pole.

Erman, Adolph (1806-1877)

*Travels in Siberia: Including Excursions Southwards, down the Obi, to the Polar Circle, and southwards to the Chinese Frontier.* - 2 volumes complete

First edition in English and an attractive copy, partially unopened.

2 vols, 8vo; 22 cm, 8.75 inches tall. pp. xi, [i, blank], 495, [1]; ix, [i], 536, with a folding map showing the route in red. [The American edition; Philadelphia: Lea & Blanchard, 1850, does not include the map.]

Erman travelled by land from Berlin to Okhotsk, then by sea to Kamchatka; he returned to Berlin from Sitka via San Francisco and South America.

Included in the narrative is an account of a sleigh trip down the frozen Obi River to Obdorsk. The English edition preserves the bulk of the narrative of the original German edition, published in several volumes at Berlin in 1833–48, but omits the scientific and illustrative matter. The translator was William Desborough Cooley, the principal founding member of the Hakluyt Society in 1846.

*Original cloth, blind-stamped design with spine titles in gilt. Bindings tight and square; hinges starting. Text clean, light even toning. Moderate handling wear. Previous owner’s small bookplate in upper corner of front paste-down. Some older bookseller pencil marks on half-title.*

Description Continues...

The Coppermine Expedition of 1819-1822 had as its goal the exploration of the northern coast of Canada, which was accessed by way of the Coppermine River. The British expedition was organized by the Royal Navy as part of its attempt to discover and map the Northwest Passage. It was the first of three Arctic expeditions to be led by John Franklin, and also included George Back and Dr. John Richardson, both of whom would become notable Arctic explorers in their own right.

The expedition was plagued by poor planning, bad luck and unreliable allies, coupled with unusually harsh weather and the resulting absence of game, meant that the explorers were never far from starvation. Eventually the Arctic coast was reached, but barely 500 mi (800 km) had been explored before the exhaustion of the party's supplies and the onset of winter forced them to turn back.

The expedition made a desperate retreat across uncharted territory in a state of starvation, often with nothing more than lichen to eat. Eleven of the twenty strong party died amid accusations of murder and cannibalism before the survivors were rescued by people of the Yellowknife First Nation, who had previously given them up for dead.

In the aftermath of the expedition, Franklin was much criticized by local fur traders for his haphazard planning and failure to adapt to the circumstances he faced, but in Britain he was received as a hero, fêted for the courage he had shown in extreme adversity. The expedition captured the public imagination, and in reference to a desperate measure he took while starving, he became known as "the man who ate his boots".
This work is notable for its focus on lesser known islands as well as important ornithological observations.

*Tales of Tahitian Waters*  
Illustrated with numerous plates from photographs taken by Zane Grey; last two plates from watercolors; pictorial endpapers.  
*Tales of Tahitian Waters* describes Grey's fishing expeditions to the Tahitian Islands in 1928, 1929, and 1930. Grey claims to be the first big game fisherman to fish these waters and there is little cause to doubt his claim. *Tales of Tahitian Waters* he claims a special affection for these waters, and he visited them several times afterward, although those visits were not the subject of this book.  
Grey believed that these were the most difficult waters he had fished. Among other trials, *Tales of Tahitian Waters* records an 83-day span during which Grey did not catch a single bill-fish. It is believed that this provided inspiration for Hemingway's *The Old Man and the Sea*.  
*Tales of Tahitian Waters* also includes descriptions of a number of previously uncatalogued species, some of which Grey caught and recorded, some of which were hooked but were too big to bring to the boat, and some of which were merely seen in the water. [wiki]
